

Envera Systems Reunites Missing Elderly Man with Family

[Active Video Surveillance](#) helps resolve Silver Alert

Land O' Lakes, FL ([PRWEB](#)) June 01, 2016 -- At 4:10 AM on Tuesday May 18th, Envera cameras detected a black 2-door vehicle in the south parking lot of a community in Pasco County, Florida. Through the Active Video Surveillance system, an Envera guard spotted an elderly male wandering outside of the vehicle. After repeatedly voicing down to the man to see why he was there and to check if he was okay, the guard contacted the local authorities for assistance.

The Envera guard maintained the live feed of the man to ensure he remained stable while waiting for the police. When the officer arrived, he ran the license plate number and determined the man's identity. The elderly man is 87, suffers from dementia and had been missing from his home in Naples, which is over three hours away.

The man's wife and son were contacted, and he was transported to the hospital to be evaluated. He has been released from the hospital and reunited with his family.

While Envera's Active Video Surveillance is renowned for its ability to deter trespassers, in this case it has proven effective in helping to resolve a Silver Alert in the State of Florida.

About Envera Systems

Envera Systems is the industry-leader in virtual gate guards, active video surveillance and access control systems for gated communities. Envera currently secures hundreds of communities, amenities and entry points, with licensed guards in their state-of-the-art central station. Through cutting edge technology and proprietary software, Envera provides better security than traditional guards for a fraction of the cost.
