

# Community +

Optimize security operations with intuitive software designed to seamlessly integrate into your community's safety network. Community+ empowers security staff with efficient tools for visitor management, real-time metrics, transparency, and responsiveness.

- ✓ seamless integration
- ✓ real-time reporting and tracking
- ✓ built in collaboration with guards

## cutting-edge community management system

Streamline security operations with a platform for staff to easily manage visitor access, log incidents, and track daily security checks in real-time, all from a mobile device

Improves response times and facilitates effective communication

Compatible with existing access control and video surveillance systems

## user-friendly for all parties

Easy-to-learn software for security guards, property managers, board members, and residents

Enables seamless communication between staff, managers, and residents for enhanced coordination during daily operations or in emergencies

***“I cannot speak highly enough of the integrity, professionalism, and capabilities of staff. I recommend them and their software without hesitation.”***

Boca Pointe, General Manager

***“The conversion of a ‘messed up’ system to their system was unbelievably smooth. We have not had any problems with the system.”***

The Lake Club, Dir. of Community Operations

**Strengthen security with software that prioritizes ease of use, comprehensive oversight, and peace of mind.**
