

Install Camera App (Apple Devices)

1. Go to the *App Store* built into Apple devices and search for the **Live Cams Pro** App.
2. Purchase and install the **Live Cams Pro** App.
3. Launch the **Live Cams Pro** App from your device.
4. Select **Add Camera/Device**.
5. At the very top of the page (easy to overlook), you will select the *Profile* type by using the search function. The type you will select will either be **Video IQ – iCVR HD** or **Video IQ Rialto**.

Video IQ – iCVR HD Cameras

Password: abcd1234

6. Test the connection. If not successful, check your settings and connection. Try connecting to a wireless network and test again. Failures often indicate incorrect settings or poor connection.
7. If more than one camera was installed at your community, please repeat this process to add additional cameras.
