

# Install iTrace App (Apple Devices)

1. Go to the *App Store* built into Apple devices and search for the **ADPRO iTrace** App.
2. Install the **ADPRO iTrace** App.
3. Launch the **ADPRO iTrace** App from your device.
4. Select **Add Device** and enter in the following information:

**Device Type:** FastTrace 2

**IP Address:** *refer to your Envera Community Portal & Login sheet*

**Control Port:** 2000

**RTSP Port:** 554

**Credential Name:** 2

**Password:** 111222

**Site Name:** *refer to your Envera Community Portal & Login sheet*

Click **Save**.

5. You will automatically be taken to the *Site List* where you will select your site to access the live view of the cameras.
6. Test the connection. If not successful, check your settings and connection. Try connecting to a wireless network and test again. Failures often indicate incorrect settings or poor connection.
7. You can use the buttons on this screen to change camera views (single view or multisplit), resolution or even take a snap shot.
