

QR Code Access for Visitors

The fastest and easiest method of visitor verification at the virtual gate guard

A QR code is a digital pass that residents can send to visitors via text or email before they arrive at an Envera community. When presented at a Virtual Gate Guard kiosk, the code will grant entry to active, preapproved guests within their designated days/times.

Generating a QR Code

1 Login to MyEnvera (from the app or the web portal).

2 **Registered guests** OR Click the QR code emblem next to the desired visitor. *(No icon indicates the listing requires a phone or email)*

3 **One-time visitors** OR Click the blue “Create” button and paste the QR code into a text, email, or app.

NOTE: Visitors must have a valid phone number or email address to receive a QR code. QR codes will not grant entry to expired visitors, those with “deny” status, or visitors arriving outside their permitted days/times. For guests designated as “one-time” visitors, the QR code will only work once
